Job Title**Company Name and description**

IT Internship
Job ID:

[Good Year Tire](#), Akron, OH

Goodyear offers paid internships to qualified active students. Experiences include challenging hands-on opportunities and professional networking in the select field. The term of the assignment can be either a full-time 10-week summer internship or a one-year internship, consisting of full-time work over the summer and part-time work during the school year. These positions fall within many areas of Goodyear's IT departments, such as: Manufacturing Operations, Quality Management, Tire Specifications, Retail Point Of Sale & Operations, SAP, IT Infrastructure, Web Operations, Data Warehousing and IT Auditing. The goal of this program is to build a pipeline of candidates for Goodyear's IT Development Program which is designed to develop graduates into future leaders through broad exposure to various business disciplines.

Education and Qualifications

Qualified candidates must:

- Have a 3.0 GPA or higher
- Be actively pursuing a Bachelor's Degree in Computer Science, MIS, Computer Information Systems, Computer Engineering or other Business related disciplines
- Have the ability to complete at least one internship assignment prior to graduation
- Demonstrate leadership and growth potential
- Have excellent written and oral communication skills
- Be detail oriented with superior analysis and problem solving skills
- Be a fast learner who is able to keep up with the rapidly changing technological field
- Have the ability to thrive in a team environment
- Excel in project management skills
- Be able to self-manage

Other Information

Qualified candidates must also:

- Be capable of interacting with all organizational levels, ranging from entry-level associates to Goodyear's senior management.
- Be a U.S. citizen or legally authorized to work full-time in the U.S. prior to program entry

[2019 – Summer – RAS Security and Privacy Intern](#)

Job ID: REQ2886

Posted: November 8, 2017

[RSM US](#) San Francisco, CA

We are currently looking for Consulting Interns for our Security and Privacy Advisory practice. The candidate will work with teams of security and privacy staff in a wide variety of systems environments. Our Security and Privacy Risk Advisory Services team serves the Information Security and Data Privacy related needs of our clients. This team assists clients with selecting, improving, controlling, securing, managing and monitoring the appropriate systems to address their information needs. We serve a diverse base of clients in a variety of industries, and understanding how technology impacts the operation and growth of organizations is what we do best.

Security and Privacy Interns provide quality consulting services to the Firm's clients by performing the duties and responsibilities listed below in an efficient and effective manner.

Examples of Responsibilities Include:

- Assess security of client networks, hosts, and applications
- Determine technical, business impact and likelihood of identified security issues and provide remediation guidance to clients
- Perform analysis and testing to verify the strengths and weaknesses of mobile and web applications and web services (SOAP, WSDL, UDDI)
- Perform Internet penetration testing using blackbox and whitebox methodologies
- Review application code, system configurations and device configurations using manual and automated techniques
- Measure and report clients' compliance with established industry or government requirements
- Work with RSM consulting professionals with a variety of credentials including Certified Ethical Hacker (CEH), Certified Information Systems Security Professionals® (CISSP®); Certified Information Systems Auditor® (CISA®) and Certified Information Security Manager® (CISM®)

Basic Qualifications:

- Pursuing B.A. or B.S. degree or equivalent from an accredited university by the time employment commences
- Major in Computer Science, Information Technology, Information Systems Management, Information Security or other similar degrees
- Minimum 3.0 GPA preferred
- Travel to assigned client locations is required. Must have access to and ability to arrange for use of reliable modes of transportation to those locations
- Technical background in computer science and related fields
- Strong knowledge of computer network technologies, protocols and topologies
- Software development, programming and/or scripting experience (Perl, Python, C, Java, PHP, ASP, etc.)
- The ability to interpret and convey technical information through written and oral communications to all levels of technical aptitude, including senior management
- High degree of integrity and confidentiality, as well as ability to adhere to company policies and best practices
- Possess a strong internal drive and motivation for continuous improvement

Preferred Qualifications:

- Practical hands-on or lab experience with IT infrastructure components such as servers, firewalls, IDS systems and other network infrastructure components
- Practical hands-on or lab experience with security applications, such as a

AppScan, Metasploit, BurbSuite, Nessus, Social Engineering Toolkit, Kali Linux, etc., or other commercial and public domain security tools

- Operating system configuration and security experience (HP-UX, Linux, Solaris, AIX, etc.)
- Configuration and security experience with web servers and web applications (Apache HTTP/Tomcat, Microsoft IIS, Sun One, Oracle iPlanet, IBM WebSphere, etc.)
- Database Configuration and Security experience (MySQL, Microsoft SQL, IBM DB2, Sybase, Oracle, etc.)
- Familiar with security testing techniques such as network discovery, port and service identification, vulnerability scanning, network sniffing, fuzzing, penetration testing, configuration reviews, firewall rule reviews, social engineering, wireless penetration testing and password cracking

Job Title

[Quality Engineering Intern](#)

Job ID: 15904

Posted: April 10,2018

Company Name and description

[ServiceNow](#)

San Diego, CA

College students—If you are a college student looking for an internship, read on. If not, check out other open positions at ServiceNow.

We've created internships for college students, and they're anything but ordinary. While we appreciate your willingness to suck it up and pay your coffee-fetching copy-making dues somewhere, at ServiceNow, we know a career is a journey, and it starts with exposure to real work. This isn't a standard entry-level gig—here at ServiceNow you'll be given responsibilities that allow you to directly impact and build our company.

Why work @ ServiceNow?

Here's what our "Class of 2017" has to say about working at ServiceNow:

- At ServiceNow you directly impact our shares, your job is important; it's actually important. No other company offers this kind of opportunity.
- Career growth is a way of life at ServiceNow; our managers truly develop employees. Add new skills to your resume, take on new challenges and discover your full potential.
- ServiceNow has the fast pace of a startup, but the stability of a bigger company.

After an internship at ServiceNow, you'll have experience with:

The position of Software/System Quality Intern will work and grow with a group of Quality Engineers. A chance to use all kind of well-known operating systems such as: Windows, Linux, AIX, etc and use all kind of languages and scripts such as: Java, Javascript, Perl, Python, Shell, etc. Also, access to use all kind of databases such as: Oracle, SQL Server, MySQL, etc.

- The person will find room for career growth as he/she explores and adopts new technologies.
- An intern position is a 3-12 months, full-time temporary assignment with ServiceNow. Internship program comes with the opportunity to identify qualified candidates for regular employment, and to provide students with the opportunity to integrate their academic knowledge with work experience.

As an intern, you will develop skills, and gain work experience in your field of study:

- Product feature and user experience review
- Requirement analysis, strengthen test plan and test cases documentation
- Perform manual testing
- System installation, configuration and setup
- Be a liaison between various development teams

What you should know before you get here:

Basic Qualifications:

- Junior year of Bachelor's Degree in Computer Science or Computer Engineering major
- Current cumulative GPA of 3.0 or higher on a 4.0 scale

Preferred Qualifications

- Network/application troubleshooting background with Linux/Unix/Windows
- Experience with database platforms, including Oracle, and SQL knowledge
- Experience in performing functional and system level tests

- Experience in programming with one of the languages: Java, Perl or Python
- Must be a good team player and enjoy working in a fast pace environment
- Excellent written and oral English communication skills
