IT Internship
Job ID:

[Good Year Tire](#), Akron, OH

Goodyear offers paid internships to qualified active students. Experiences include challenging hands-on opportunities and professional networking in the select field. The term of the assignment can be either a full-time 10-week summer internship or a one-year internship, consisting of full-time work over the summer and part-time work during the school year. These positions fall within many areas of Goodyear's IT departments, such as: Manufacturing Operations, Quality Management, Tire Specifications, Retail Point Of Sale & Operations, SAP, IT Infrastructure, Web Operations, Data Warehousing and IT Auditing. The goal of this program is to build a pipeline of candidates for Goodyear's IT Development Program which is designed to develop graduates into future leaders through broad exposure to various business disciplines.

Education and Qualifications

Qualified candidates must:

- Have a 3.0 GPA or higher
- Be actively pursuing a Bachelor's Degree in Computer Science, MIS, Computer Information Systems, Computer Engineering or other Business related disciplines
- Have the ability to complete at least one internship assignment prior to graduation
- Demonstrate leadership and growth potential
- Have excellent written and oral communication skills
- Be detail oriented with superior analysis and problem solving skills
- Be a fast learner who is able to keep up with the rapidly changing technological field
- Have the ability to thrive in a team environment
- Excel in project management skills
- Be able to self-manage

Other Information

Qualified candidates must also:

- Be capable of interacting with all organizational levels, ranging from entry-level associates to Goodyear's senior management.
- Be a U.S. citizen or legally authorized to work full-time in the U.S. prior to program entry

[Waupaca Foundry](#)

Waupaca, WI

ROLE:

Assist with corporate controlling projects and analysis relating to budget preparation, profit and loss variance to budget, operational performance, capital project payback, and product costing. Will primarily be using excel spreadsheets to gather and organize data for use in analysis.

RESPONSIBILITIES/DUTIES:

- Update weekly reporting of operational performance metrics with information from ERP systems.
- Preparation and updates of monthly and yearly reporting spreadsheets. Setup files for new fiscal year and update monthly.
- Monitor stockroom checkouts to help determine accuracy of general ledger assignments.
- Tracking current and gathering historical maintenance order and maintenance department spend for all manufacturing facilities.
- Tracking current and gathering historical pattern shop order and department spend for all manufacturing facilities.
- Update standard vs. actual tracking.
- Other data gathering from iSeries and SAP ERP systems into excel format.

QUALIFICATIONS:

- Motivation and great attitude.
- Be enrolled in post-high school education for the Fall 2017 semester.
- Minimum of 1 completed year in related field (preferred).
- Be considered a full time student (12 credits or more).
- Be 18 years or older.

[Software Engineering Intern](#)

Job ID:

Posted: January 26, 2017

[MicroStrategy](#)

Tysons, VA

Join us for a 10-week paid, summer internship that offers professional development, networking events, and mentorship within our tech organization. This program will allow you to be a part of an agile software development team performing java and/or open stack development. You will have the opportunity to make an impact on our business and provide our customers with the most powerful, scalable, and user-friendly platforms for analytics, mobility, and security.

Your focus:

- At the engineering level, participate in the design, development, testing, and debugging of software components and products.
- Be part of solving cross team and product delivery issues, with the goal of driving pro-active communication across teams.
- Develop and document procedures for new software enhancements and/or product upgrades.

Qualifications

You should bring the following skills and experience:

- Working towards a B.S. in Computer Science or Computer Engineering with a graduation date by May 2018
- Experience in development on both Unix and Windows platforms, including NT/2k and Solaris (AIX and/or Linux is a plus)
- Strong object-oriented design & development skills
- Knowledge of programming languages, such as AngularJS, Ruby on Rails, React, Kafka, Bootstrap, iOS, SWIFT, or Android
- Expert-level programming development skills, including familiarity with templates, exception handling, namespaces, memory management, and internationalization. Familiarity with database applications and SQL is highly desirable; familiarity with COM is desirable
- Strong knowledge of data structures, algorithms, operating systems and other fundamental computer science concepts
- Fluent in object-oriented programming languages, such as C++ and Java.
- Strong analytical, communication, and problem solving skills
- Team-oriented individual, energetic, result and delivery oriented, keen interest on quality

What You'll Do

The mandate of the Frontier program is to 'modernize' Equity's (store operations legacy system) underlying technology foundation without introducing any major functional changes. 'Rewrite' all the components with the exception of obsolete functions and replace some functions with new software engines (i.e. signage, reporting, search, security).

Who You Are

- We are looking for talented individuals who:
- thrive solving problems and are able to balance and prioritize activities
- drive innovation with their 'think outside of the box' mindset
- take initiative and are able to successfully manage projects
- build relationships easily, and are collaborative team players with strong communication skills

What You've Done

- Second year post-secondary education in computer science or a related discipline
- Strong communication and analysis skills
- Ability to operate effectively in a fast paced environment, learning quickly & delivering results
- Quick learner
- Analytical problem-solver
- Familiar with MS office (Word, Excel, etc)
- (AS/400 environment, TurnOver, Probe/Abstract - will be trained on these)
- JAVA knowledge and general system development experience

Assets

- Specific technology background in C# (2.0 and 4.0) and SQL Server 2005/2008
- ETL experience; specific technology background in SQL Server Integration Services (SSIS)
- Source control and IT change management experience
- Business Intelligence integration (i.e. Crystal Reports)
- Prior Supply Chain experience +/-or Prior Project Management experience
